POPULATION OF ALBERTA WILL LIKELY REACH 600,000

The Alberta population is increasing at a rapid rate. The census of 1906 showed that the province had a population of 400,000. It is estimated that by 1911 the population will have increased to 600,000. This increase is due to the large number of immigrants who have come to the province in recent years. The population of the province is now distributed as follows: Calgary, 100,000; Edmonton, 80,000; Lethbridge, 40,000; Regina, 30,000; and other towns, 150,000.

Mens and Boys Week at the Big Store

SWEEPING REDUCTIONS IN CLOTHING

370 Men's and Boy's Suits to be Sacrificed

This week our efforts are being centered on our Men's and Boys' Clothing

Departments. Anticipating a mammoth crop this season we bought heavier than usual in men's and boys' clothing and now that our crops have been partially damaged by frost we find the sale of clothing greatly reduced. Rather than carry the surplus stock over for another season we have decided to put on a mammoth clothing sale. These are all new suits bought for this season's selling.

Our loss will be your gain. Remember 250 suits go on sale Thursday morning, Nov. 30th.

Never before have we been in the position to offer such good values in sheep lined clothing as we are this season. We want you to come in and compare our values with other lines you have seen. If our coats are not everything we have said about them then we do not want to sell you. We know we can save you from \$1.00 to \$3.00 on a sheep line coat. This is a strong statement and we want to prove it to you. COME IN.

Sheep Lined Coats

This coat is our big seller, made from good strong English Bedford cord in dark shade, fly front, patent fasteners, leather bound arm shields and pockets, extra heavy sheep pull lining, sleeves lined with extra heavy Kersey cloth, wool wristlets, high storm collar made of Australian Woolen, sizes 38 to 50, extra special value \$8.50

Beaverette collar, sheep lined, made from extra strong English Bedford cord, in dark shade, body lined throughout with extra heavy sheep pull, fly front, snap fasteners, sleeves lined with extra heavy Kersey cloth, with wool wristlets, sizes 38 to 50, extra special value \$8.00

In front, cuffs, pocket flaps and pockets, extra heavy sheep pull, strap, button, sizes 38 to 50, extra special value \$9.95

Tweed Overcoats

As space will not permit us to give a detailed description of these coats we will let our salesmen tell you about them with letting you know that the department has not been forgotten in this big special sale. Visit our clothing department and see for yourself these coats marked with the big sale ticket. Be sure to look them over and you will not be sorry you noticed our ad. this week.

THE FACT is, according to the experience of a long list of... concrete is the ideal material.

"What The Farmer Can Do With Concrete."

Concrete is a material of great value to the farmer. It is strong, durable, and fireproof. It can be used for many purposes, such as for foundations, fences, and driveways. It is also a good material for building barns and other farm buildings.

Announcement

I desire to announce to my customers and the public that I have sold my business and good-will to Mr. F. C. Walker and Mr. Robert Whitson (both formerly from Portage La Prairie, Man.) and I earnestly submit for them the continuance of your patronage, which has been so liberally extended me during the last six years, and for which I wish to express my sincere appreciation. I can assure all that both my successors have a thorough knowledge of "Man's Clothing and Furnishings" business and will endeavor to hold all my customers as well as gain many new ones in order to build up a greater and better business than has been accorded me.

Thanking you for past favors, I am,

Yours sincerely,

L. O. WISLER,

Important Announcement

Our friends, we have announced to the public that we had placed the credit end of our business on a strictly cash basis. After giving this system a trial of three months, we find that, although no improvement over the old-style of loan, date credit, yet it is not the system that is conducive to the building up of a large successful business.

After discussing the merits of a strictly cash business with a number of our customers, and also with a number of large business concerns throughout the country, who have adopted the cash system, we have decided to place our business on a STRICTLY CASH BASIS, starting with May 1st. It is our desire that in doing so, it is perhaps one of the most drastic changes a retail merchant can make in his business.

In this, the first announcement of the change we are making, we will not entangle on the advantages to be derived from the cash end of the credit system, we believe they are apparent to all. During the next six weeks we will have several circulars explaining in detail the merits of a cash business. We want every customer in the Stettler district to receive these circulars. We want your name on our mailing list. If you are not receiving our circulars drop us a post card and we will call on you or if we cannot do so we will write you a personal letter.

TO OUR CREDIT CUSTOMERS

To those of our customers who have been running accounts with us on a 30 day basis we have a proposition to offer that we believe will effect any arguments you may have against the cash business. Before making arrangements with other business houses for your account we would ask that you call and let us explain in detail our system. If this is impossible drop us a post card and we will call on you or if we cannot do so we will write you a personal letter.

WE HOPE OUR EFFORTS TO GIVE YOU MERCHANDISE AT MORE REASONABLE PRICES WILL BE APPRECIATED, AND THAT WE MAY STILL BE FAVORED WITH YOUR KIND PATRONAGE.

YOURS RESPECTFULLY,

SHARPE & PAGE

A CASH PRICE OF \$15.00

As a stimulant to our cash business we offer a cash price of \$15.00, divided \$10.00 1st and \$5.00 for 2nd price to every person working in an office of not more than 300 words, on "Why Sharpe & Page should be a Cash Business."

These essays to be delivered to our office not later than April 15th. A committee of two have kindly consented to act as judges of these essays. The essay winning the above will be published in this paper.

GENTLEMEN:

The 30th day of January this season, I took delivery of a 48 H. P. Twin Cylinder Engine from your firm. I wish to say that I am more than satisfied with the work I have done.

I have used the engine continuously since that time, in threshing and plowing, and have not needed the assistance of an expert at any time. I can heartily recommend the I.H.C. Engines and Oliver Plows to any prospective purchaser.

Railway Communication is Coming West

Many people are wondering when the new Canadian Northern Railway will be completed. It is a fact that the line is now being built from Winnipeg to the west coast. The line will be a great help to the people of the west. It will be a great help to the people of the west. It will be a great help to the people of the west.

Waving of Flag will Not Allow Nations of West That it was Bubbled

The people of the west are waving the flag of independence. They are waving the flag of independence. They are waving the flag of independence. They are waving the flag of independence. They are waving the flag of independence.

ANNOUNCEMENT!

THE ANNOUNCEMENT IS NOW MADE OF THE SALE OF THE IMPORTANT NEW CANADIAN NORTHERN RAILWAY DIVISIONAL POINT.

HANNA

ALBERTA

This Sale Will Take Place on Wednesday, August 7, AT SASKATOON

HANNA is the second divisional point west of Saskatoon on the Saskatoon-Calgary line of the Canadian Northern Railway.

HANNA is to be the divisional point on the proposed Canadian Northern line connecting Vermilion with Medicine Hat.

HANNA has all the advantages required to produce an important town of rapid growth.

HANNA is the centre of one of the richest and most populous areas in Alberta.

HANNA will have the railway facilities to give it this commanding position. It has also the proper kind of country back of it and the population surrounding it to support an important town.

HANNA will grow fast into one of the very best towns on the Canadian Northern Railway System.

HANNA has a huge and very productive area extending for long distances on all sides. At the present time Government statistics show that 10,866 homesteads have been taken up during 1910-11 within a radius of eighteen miles of Hanna. Only 654 are still available within this radius. This entire country is one of the best wheat districts in Alberta.

HANNA is the junction point of the Saskatoon-Calgary line and the Canadian Northern line running to the important and growing Brasserie Coal Field territory.

HANNA has the best prospects of any western town ever offered to the public by the Canadian Northern Railway.

HANNA will quickly and necessarily become the chief distributing centre for this entire middle western section.

Date of Sale Wednesday, August 7, at Saskatoon.

SPARKLING WATER, and all other, refills the former who build a Concrete Well or Tank

THE FARMER, shows all others, appreciate good water. He drinks it, uses it for his family, and for his stock. The city dweller is dependent upon the public water supply for the purity of his water, while the farmer can have his own private source of water, and thus he can be sure that it is pure and healthful.

MAN has found a better drink than cold water, properly collected and stored. But in order to keep water fresh and pure, a tank or well casing that will keep out every possible impurity must be used.

CONCRETE IS THE IDEAL MATERIAL FOR TANKS AND WELL-CASINGS

It is absolutely unalterable, proving its water from the fact that it is not affected by acids, alkalis, or any other substance. It is not affected by acids, alkalis, or any other substance. It is not affected by acids, alkalis, or any other substance.

What kind of a silo will you build?

Wood—or Concrete?

If you want to build a silo, the choice of material is the first thing you should consider. Wood silos are cheap, but they are subject to decay and fire. Concrete silos are more expensive, but they are permanent and fireproof.

CONCRETE SILOS LAST FOREVER

When you build a silo, you want it to last. Concrete silos are built to last. They are made of concrete, which is a material that does not decay or burn. They are also built to be strong and durable.

QUALITY is the foundation of a shoe and to many, the most important. Without the proper foundation in a shoe, the style will crumble and fall like a house built upon an unstable foundation. The prime factor in good shoemaking is the **QUALITY** of the material used—the Workmanship. Our shoe department represents the highest art in shoemaking. The styles are pre-eminently individual and distinct. The quality absolutely reliable and workmanlike the best. All of which is a chance to show men what we really are.

Explosion at the Fire Hall

Chief of Police Hse, Detective Tudor and Mason, have Narrow Escape

A startling explosion occurred at the Fire Hall, which is situated on the corner of 1st and 2nd streets, at 11:20 a.m. today. The explosion was caused by a gas leak from a gas stove in the kitchen of the Fire Hall. The explosion was so powerful that it blew the roof of the building off, and caused a large fire to break out. The Chief of Police, Hse, Detective Tudor, and Mason, were in the building at the time of the explosion, and they all escaped with only minor injuries. The fire was quickly extinguished by the Fire Department, and the building was repaired. The cause of the explosion is still under investigation.

SPRING IS YOUR OPPORTUNITY

I spent an hour at the L. W. EYESTONE
WAREHOUSE in STETTLER, this week.
The building is filled to the top with Farm Machinery of
all kinds. The biggest warehouse in Central
Alberta.

But just at this time the firm is making a
specialty of SEEDERS, DISCS, PLOUGHS,
HARROWS and all other machinery that make
Spring Work a Pleasure.

Eyestone makes a specialty of two kinds of
Farm Implements — The DEERING KIND
and the McCORMICK KIND. Both are
the best. He puts his foot down on the POOR
KIND.

THERE'S A REASON — Most
farmers are shrewd business men and they know
that can get MORE WORK out of Deering

for Repairs than any other Farm Machinery
on the market.

Mr. Edison
has invented a New Record
that will reproduce all of your first
enthusiasm in your Edison Phonograph
— a record that makes your Edison Phonograph and
as the first sound reproducing instrument that can be
had. The new record recaptured the Blue National. It
is now the greatest achievement in the history of
the Edison Phonograph. It is the first record that
is practically indestructible and will never wear
out. Go to your Edison dealer today and
ask him to play some of these wonderful
Blue National Records. They take three
times to keep and play the rest of your life.

SPRING
IS YOUR OPPORTUNITY
I spent an hour at the L. W. EYESTONE
WAREHOUSE in SETTLER, this week. The
building is filled to the top with Farm Machinery of
all kinds. The biggest warehouse in Central
Alberta.
But just at this time the firm is making a
specialty of SEEDERS, DISCS, PLOUGHS,
HARROWS and all other machinery that make
Spring Work a Pleasure.
Eyestone makes a specialty of two kinds of
Farm Implements— The DEERING KIND
and the McCORMICK KIND. Both are
the best. He puts his foot down on the POOR
KIND.
Go where you will through the Settler
District and you will find the farmers using one or
both of these makes of machinery.

HON. DUNCAN MARSHALL and OTHERS.
EVERYBODY CORDIALLY INVITED!

A black and white photograph showing a vast, overcast sky with soft, diffused light. A dark, horizontal line, likely a horizon or a distant shoreline, separates the sky from a darker, less detailed foreground. The overall mood is somber and atmospheric.

The machine is constructed with special care. The frame consists of one piece of steel under the most severe strains. The guards are made level with the top of the platform allowing short grain to be cut without belching or jamming. The platform is made of heavy plate gusseted for handling hot, short, dense or toughed grain. A special roller pulls down the grain from the top of the elevator. The thin discharge apron keeps the material clean and clear of unwanted grain. The heavy elevator has a special flexibility without the usual vibration. Either smooth section or serrated knives can be used in the elevator. The improved Hotchkiss cranker is a very strong feature.

Hotchkiss cranks are built especially for Western conditions. They are made of heavy steel and are also very durable. They are made in a variety of sizes and are also available in steel or light gauge. You can count on them to give you the most efficient and reliable service.

OAK LAKE FLOUR

Tea Table Talks

The first Tea came from China. It was a raw, crude product—a luxury for the rich alone.

Then experimenters set to work to find other good Tea-growing soils. They found such soils—in India—in Java—in Ceylon and other parts of the world.

Various crops were blended. Thus came the Teas we know.

The last word in Tea is

Blue Ribbon Tea
a choice, rich Tea, of exquisite
aroma--sold only in air-tight
packages--and the most economical
as well as the best.

Dupe

The last Monday evening at Lincoln the Shamrock and Shamrock teams had a hard fought battle for second place in the league. A. H. Kelly of Lincoln was chosen as umpire, and gave his charge.

maintaining in their winning the championship of the Isthmian Mercantile League, establishes their claim to be considered better exponents of the game, than the usually victorious local teams.

Bowers, Weaver and Kyriotes are inspiring their men, with the spirit of enthusiasm, for this great game, and the men are responding most heartily, taking their position seriously, in order not to let down their forms for this big occasion. It was a surprise to find that the "Cameo" was not a new place, but an old one. It was the same place that had been the "Cameo" for many years. The "Cameo" was a small, one-story building with a sign that read "Cameo". The sign was in the shape of a heart and had the word "Cameo" written in a cursive font. The building was made of brick and had a small porch with a railing. The porch was made of wood and had a small roof. The building was surrounded by a lawn and some trees. The "Cameo" was a popular place for people to go to in the 1950s. It was a place where people could go to dance and listen to music. The "Cameo" was a place where people could go to have a good time. The "Cameo" was a place where people could go to be happy.

The history was given by the four different ladies, each in her own way. The first was the history of the nation in France, and then in England. We were told that the history of the nation was the same in all countries. The club is proving a great success.

Thumps often occur in young pigs and to the result of lack of exercise and overwork along with high feeding. The remedy is, of course, to cut down the sow's feed and force the pigs to take exercise out in the open place. BURNING DAYLIGHT

By JACK LONDON

CHAPTER XXIV

There was a long silence in the room. The light from the window fell on the floor, and the shadows of the furniture were cast on the wall. The man sat there, looking down at his hands, which were clasped in his lap. He felt a great weight upon his heart, and he knew that he could not escape from it. The silence was broken by the sound of the door opening, and a woman entered the room. She looked at him with a sad expression, and she knew that he was in trouble. She went to him and sat down, and she tried to comfort him. But he would not let her. He felt that he was alone, and he felt that he was dying. The light from the window grew dim, and the shadows grew longer. The man closed his eyes, and he felt that he was going to sleep. But he knew that he was not sleeping. He was dying. The light from the window disappeared, and the room was in darkness. The man was alone, and he was dying.

On another page of this paper you will find a cut of the interior of our store. To those who have never visited Stettler this cut will give you some idea of the mammoth stock we carry. A stock unequaled in size or quality in any town in Alberta, we believe this statement cannot be challenged.

We would also draw your attention to our grocery department which is fitted throughout with dust proof Walker bin fixtures, this we believe will appeal to all those who wish to procure nice clean fresh groceries. Because of our large buying power we have been fortunate in being able to secure

ing. To the extent of *Proton*'s influence, it is not important to me that *Proton* does not fully realize the importance of our work, or that the magazine will be short of product, or that the stockpile and thus the price of the product will rise. I have sold more than 100,000 copies of *Proton* and I am happy to be allowed to continue to publish it. I have no doubt that the work of the other journals and publishing houses planned or meant to be published is also important. To the extent that *Proton* is a first-class journal, I am happy.

There is no way to estimate the amount of water and fuel that will be needed to produce food for the world's growing population. The only thing is certain: it will be a great deal more than we have today.

It is a Good Story to Tell in: A Good Place to Do Business in: And

had been there then, when he came here

Mr George Laidlaw one of the best known and prosperous farmers in the county, was one of the principal prize-winners at the Scottish Fair in the heavy horse classes a few years ago.

I came to Alberta from North Dakota twenty-five years ago. I had less than twenty-five cents in my pocket when I got here and it would have taken twenty-five thousand dollars to buy the land I now own. I was a ranchman and later engaged in ranch-

I don't like

I can name five settlers from Polk as years ago, and took up a homestead. When I started I had about thirty dollars to my name, and while I had farmed in the country, methods were very different. I worked for Perham, and then for another settler, and farmers, and managed to save little from my earnings, and I bought a cow every year. I bought three pigs one year.

worked into a bonfire. Of late years I have been breeding heavy horses, I keep a Belgians and Belgian Stallions, and many of my mares and mares are prize winners at the district fairs. I have a bunch of ninety heavy horses now but I am changing from horses to cattle as I believe they are more easily disposed of, and for spot cash this and my household are worth \$20,000 an acre now. I have cattle good work horses, mares, bays, ches, and about \$200,000 worth of machinery. I have 100 acres of corn this year. I make it a point to be in last ready and get my crops in early in the spring so I find that the spring is the cause of more

They Have a Successful Season

Other Brothers are the largest private ranchers in this part of the Territory now. These gentlemen, Thomas and Chas. C., own over 2,000 acres of land, besides having 1,500 acres. They are breeding Clydesdale horses and Hereford

the grasscoopers ate us out. . . . But the thing was always happening to make things tough for the farmers. I brought me six acres of alfalfa for \$11.00 per acre and two years later sold it for \$10.00.

I brought a team of horses, a team of ponies and two cows up here with me, and I had about \$100.00 in cash after I settled in Laramie. . . . I went out and bought a horse and a cow, lived just by the far-flung country, and in time was well enough to get started making my own back.

There has never been a year that we could not sell out at an advance

Lately, even rainy has been giving scares: I have gone into the mud farming more extensively, this year I am feeding about 150 chickens. I have disposed of a lot of my cattle. I figure that I have made about \$2,000 in a year since I came up here, and have no hesitation in advising my friends to come here and get a start, while good land may still be had at reasonable prices.

**A PRACTICAL TRAINING IN THE PRACTICE
:: AND THEORY OF GOOD FARMING ::**

The School buildings will be completed toward the end of July, and will be furnished and equipped in a first-class manner for the teaching of practical and scientific agriculture, domestic science, and household economy. The buildings are most complete in every respect, and have been pronounced by experts to be particularly well adapted to the purposes for which they are being built. The machine shops, carpenter shops, chemical laboratories and libraries will be equipped in a thoroughly adequate manner, so as to afford the boys who attend the Schools the same advantages that they have in the first two-year's course in any agricultural college. A staff of competent teachers will be engaged for each of the Schools.

Clareholm School

From: W. J. Staddon, B.A., B.S., Ph.D.

The principal of the Ohio school is Mr. W. J. He received his education at the public school and North college graduate attending the college for four years before coming to the States. In the spring of 1897, he came to the States with a wife and four dependent children, and he has since been engaged in the organization and betterment of communities, and in the last year he has held charge of the dairy and animal industry departments of the agricultural college at Denver, Montana, and in two months done the short course of agriculture in connection with this college, where position he occupied until January 1900. This is the first time that he has been employed in the United States, and he is now in the United States with extensive knowledge of the business of agriculture and the poultry industry. Mr. Elliott is a native of Ontario, Canada, and he is now in the United States with extensive knowledge of the business of agriculture and the poultry industry.

He then quietly climbed his ladder, flung it to the ground near the back of the truck, and returned to the truck, with a bang on the handle of the closed door. He returned to the back of the truck, opened the door, and took the rental van inside County Jail. He presented the fence rule to the driver's wife, who the fence had kidnapped and the man returned to the shop. This oven test means

bake-day "luck"

If your baking results very, you may find the reason in the flour. For there is only one way that a miller can assure you constant success. An even test must be made.

We take ten pounds of wheat from each miller's delivery and bake it in the oven. The flour is then tested for its baking quality. This is the only way to test the flour.

You can look at the flour and see the difference. The flour is then tested for its baking quality. This is the only way to test the flour.

"More Bread and Better Bread" and "Better Party Flour" are the only flours that can be tested in this way.

Which Shall it Be?

Most people count more on Quality than they do on price.

But if there be any who consider price before quality we wish to emphasize the slogan

"Quality is the true test of cheapness."

VERUS

While we emphasize quality in every department of our business we also protect your interests in the matter of price.

We afford the only real economy that consists in getting the best goods at lowest possible cost.

Concrete Curb Elevators

Are the best and most reliable for use in all cases where it is desired to raise material from the ground to the top of a building. They are made of concrete and are therefore fireproof and durable. They are also very cheap and can be installed in a few days. For more information, write to the Concrete Curb Elevator Co., 1000 Broadway, New York, N.Y.

The Value of Good Stationery

You must always be on hand with the importance of sending out your correspondence in a manner that will create a good impression. Don't save money by first attaching your expenditures for stationery. Get the best. The money is well spent in good business stationery. In fact, it is a business that has been built on the fact that the advertiser, etc., were getting up in such a manner as to leave the receiver under the impression that the advertiser was a person of great importance. Send your orders for good stationery to this office.
